

I. Exercise 1

```
using System;

using System.Collections.Generic;

using System.ComponentModel;

using System.Data;

using System.Drawing;

using System.Linq;

using System.Runtime.CompilerServices;

using System.Text;

using System.Threading.Tasks;

using System.Windows.Forms;

namespace Week2_playingcards

{

    public partial class Form1 : Form

    {

        public Form1()

        {

            InitializeComponent();

        }

        private void button1_Click(object sender, EventArgs e)

        {

            if (listBox1.SelectedIndex != -1) {

                ShowCard(listBox1.SelectedItem.ToString());

            }

            else

            {

                MessageBox.Show("Please select the card from the listbox!!!");

            }

        }

        private void ShowCard(string card)

        {

            //card = card.Trim().ToUpper();

            switch (card)

            {

                case "Four of hearts":

                    showfheart();

                    break;

                case "Queen":

                    showQueen();

            }

        }

    }

}
```

```

        break;

case "Ten of hearts":

    showtheart();

    break;

case "Show all cards":

    showall();

    break;

    }

}

private void showfheart()
{

    pictureBox1.Visible = true;

    pictureBox2.Visible = false;

    pictureBox3.Visible = false;

}

private void showQueen()
{

{

    pictureBox1.Visible = true;

    pictureBox2.Visible = true;

    pictureBox3.Visible = true;

}

private void button2_Click(object sender, EventArgs e)
{

    Close();

}

}

}

```

II. Exercise 2

```
using System;
```

```
using System.Collections.Generic;
```

```
using System.ComponentModel;
```

```
using System.Data;
```

```
using System.Drawing;
```

```
using System.Linq;
```

```
using System.Text;
```

```
using System.Threading.Tasks;
```

```
using System.Windows.Forms;
```

```
namespace Week2_playingcards
```

```
{  
    public partial class Zeronum : Form
```

```
{  
    public Zeronum()  
    {  
        InitializeComponent();  
    }  
}
```

```
private void button1_Click(object sender, EventArgs e)
```

```
{  
    int x = 99, y = 100, z = 101;  
    listBox1.Items.Clear();
```

```

        listBox1.Items.Add("x is set to " + x);

        listBox1.Items.Add("y is set to " + y);

        listBox1.Items.Add("z is set to " + z);

        Zero(ref x);

        Zero(ref y);

        Zero(ref z);

        listBox1.Items.Add("x is set to " + x);

        listBox1.Items.Add("y is set to " + y);

        listBox1.Items.Add("z is set to " + z);

    }

    private void Zero(ref int number)

    {

        number = 0;

    }

    private void button2_Click(object sender, EventArgs e)

    {

        Close();

    }

}

}

```

III. Exercise 3

```

using System;
using System.Collections.Generic;
using System.ComponentModel;

```

```

using System.Data;
using System.Drawing;
using System.IO;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;

namespace Week2_playingcards
{
    public partial class Countries : Form
